WINE DECANTIERE

7
WONDERS
OF THE WORLD
OF WINE

THE TASTE

The wine reaches new heights.

By using The Decantiere you will notice a significant improvement of the wine.

Flavors will come out and the finish will improve.

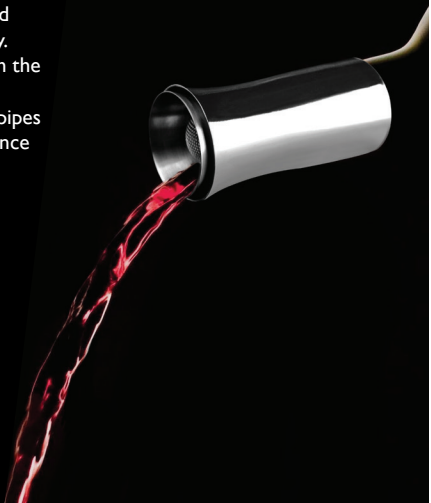

That's how the wine makers want you to drink their wine.

POURING

Extremely easy to use.

Attach The Decantiere and you can serve immediately. Wine may be poured from the bottle in any direction. The built-in dual-functional pipes ensures optimal performance no matter how you pour.

AERATION

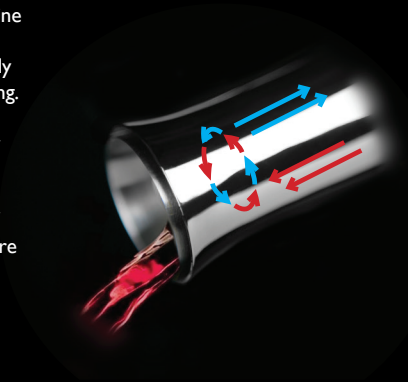

A little technical wonder.

It is a dream to aerate the wine instantly.

The air mixing chamber gently oxidize the wine while pouring.

The built-in mesh is precisely balanced, so wine and air are mixed during serving.

To enable this process, the 7 built-in dual-functional tubes are supported by 8 small vents positioned at the grid edge.

FILTER

Captures cork and lees

The built-in mesh is so dense, that lees, cork residues and other impurities are kept back when pouring.

This ensures optimal enjoyment of the wine.

Simply clean under running water.

Do not use detergent or put in dishwasher.

NO DRIP

No wine stains on the cloth.

It is not necessary to use napkin or drip collar in order to avoid unwanted droplets on the table.

The dual pouring edge ensures no dripping in connection with pouring.

AIR TIGHT STOPPER

Keeps leftovers fresh until
next day.

Wine leftover is not a problem.
It can be saved and the good
quality can be preserved.

The separate stopper ensures
good wine stays fresh for a day
or two after opening.

Opened wine should be stored
upright and airtight.

COVERS FOIL EDGES & SCREW TREADS

Especially on older vintages foil may have 'stuck' and become difficult to cut neatly. Badly cut foil edges are completely hidden by the Decantiere.

More and more wineries choose to use screw caps instead of corks. The outer metal casing hides the threads of screw top bottles.

In this way bottles are elevated into an elegant, exclusive level.

ONE-HAND OPERATION

Simple to use

One-hand operated.
Just pour.

No need for napkin or
drip collar on the bottle.

Marcus Vagnby
Industrial Designer

VAGNBYS

DESIGN & LIVING

Firmly constructed objects, beautiful in shape and effective for its purpose. Add ideas exceeding shape and function, and good design is created.

Danish industrial designer Marcus Vagnby shows with minimalist aesthetics how mind, function and materials go up in synthesis. This is experimental modern design in its use of materials and is often inspired by genuine necessity. His design maintains elements of surprise and deep intellectual beauty, because it relies more on invention than on the development of styles.

Vagnbys Design & Living is made for the modern and conscious consumers who want a modern home where style and elegance is of high priority.
