

## CXO Solutions Obtains ISO 27001 Certification for Information Security Management

**Utrecht, The Netherlands, September 14, 2016**

CXO Solutions, provider of CXO-Cockpit® integrates Strategic Performance Reporting solutions for leading Enterprise Performance Management (EPM) systems, has now achieved ISO/IEC 27001:2013 certification for Information Security Management.

By earning this internationally recognized certification, CXO Solutions has proven its commitment to data protection and continuous improvement. This is a direct response to the needs of our customers and partners in an ever evolving environment and compliments our long term vision for security best practices.

Joost Vogelesang, COO at CXO Solutions comments: "Securing ISO 27001:2013 certification demonstrates our ongoing focus on robust security practices and risk management. By benchmarking our policies and procedures against this internationally recognized Information Security Management System Standard, our customers and partners can be assured of the resilience and excellence of our service."

ISO 27001 is an internationally recognized information security management standard which ensures organizations can apply a framework to business processes to help identify, manage and reduce risks to information security, and considers not only IT but all business operations. Whereas in the past, accreditation levels were required of suppliers to the enterprise market; the same assurances are increasingly sought by organizations of any size, in an effort to manage risk within the business and secure the information it relies on to perform.

### ABOUT CXO-COCKPIT

CXO-Cockpit is an independent software company founded in 2007 by a team of Finance and Enterprise Performance Management (EPM) professionals with the aim of helping finance teams overcome the limits of Excel-based reporting processes and generic Business Intelligence (BI) tooling, optimize their processes and unleash the full potential of their organizations' EPM systems, information and human talent. Thanks to prebuilt financially-intelligent EPM connectors, fully integrated commentary/narrative and strong reporting process governance, the HTML5 mobile and web-based CXO-Cockpit Strategic Performance solution ensures a true, shared and trusted single point of insight for fast and secure decision-making with full financial control, anywhere and at any time. CXO-Cockpit has an exclusive global customer base of over 80 multinational corporations and provides integrated Strategic Performance Reporting Solutions for all leading Enterprise Performance Management (EPM) systems, including Oracle Hyperion (Enterprise, HFM, and Essbase) SAP (BPC, BW, HANA) Tagetik and IBM (TM1).
