# MEET THE TEAM

BrainCo is an innovative startup which specializes in BMI (Brain Machine Interface) wearables used to help people improve their attention level and reach their peak performance. Founded in February 2015 and incubated in the Harvard Innovation Lab, BrainCo aims to improve working efficiency through a scientifically-proven training method called neurofeedback training.

#### FOCUS 1 The Ultimate Brain Efficiency Improvement Solution

#### Convenient, Affordable, Enjoyable

## WHAT IS FOCUS 1

Focus 1, our first product can monitor, analyze and visualize brainwaves. It draws inspiration and techniques from neurofeedback training algorithms. This training method improves an individual's everyday focus level by training specific brainwave frequencies.

Focus 1 can also convert brainwaves into various commands that control different devices such as lights, prosthetic hands, toys, and appliances.

### MIND-BLOWING AT 2016 CES

Focus 1 was featured in 70+ media, including influential organizations such as USA Today, AFP, Fox 5, Discovery News, and Yahoo Tech. BrainCo was the only startup listed in "8 takeaways on 2016 CES" by AFP along with Samsung, Google, Oculus and other major companies during 2016 Consumer Electronics Show (CES).
