

What is PinPoint?

To PinPoint Travel Calendar™ is a web-based application that keeps track of where your mobile employees are now, where they have been and where they are going in the future. Why is this important? Because companies can easily miss key tax, immigration or legal milestones when employees are working in a different location. PinPoint solves this problem with alerts and reports that warn you when a compliance threshold is near.

PinPoint keeps you compliant

Designed to help companies stay in compliance for tax, immigration and legal purposes, the PinPoint Travel Calendar makes it easy for both employers and for busy mobile employees. What makes PinPoint easy? Employees can use the simple mobile interface with geo-location to make “check-ins” fast. Employers can “set and forget” because the system will automatically send alerts when something happens that requires their attention. **Easy to use and powerful as well!**

PinPoint advantages:

PinPoint provides a robust administrative interface that allows administrators the ability to easily track thresholds for tax and immigration purposes, review employee locations and run reports. Some of the administrative features include:

- 📍 **Ability to view employees calendars**
- 📍 **Track time spent in different countries**
- 📍 **View analytics to identify at risk employees**
- 📍 **Build your own reports**
- 📍 **Create custom screens and fields**
- 📍 **Get automatic alerts for key events**

Load travel data from other systems

Travel data can be bulk loaded into PinPoint for analysis from a variety of travel company data formats.

Single sign-on for AssignmentPro users

Employees that use AssignmentPro can link to PinPoint without logging in separately.

Employee tools

Employees can easily “check in” while traveling using either their mobile devices or a computer. PinPoint uses geo-location to keep the process very simple and remembers common locations for the employee.

PinPoint your company’s risk

PinPoint provides a robust administrative interface that allows employers the ability to easily track thresholds for tax and immigration purposes, review employee locations and run reports. Some of the administrative features include:

Interactive maps to highlight risk by country or US state

Drill-down capability from maps – right to an employee calendar

Bulk load your company travel data for analysis

Run and save reports

Load your employees from a spreadsheet

Use custom fields to track project teams

Get automatic alerts for key events

ABOUT EQUUS

More than 200 global organizations rely on cloud-based technology from Equus to support their talent mobility programs. Equus technology allows program managers to focus on adding value to their business by automating mundane, transactional work. Equus’ clients are the happiest in the industry because of a track record of successful delivery, continuous innovation and a staff with deep experience in corporate mobility.
