

*Mothers are special. They are God's gift to mankind. And behind every successful man, there was a mother somewhere in his past who gave so that others might live.*

*This book is a testament to the power of a mom's words spoken with truth and clarity. They reflect the voice of a mother who cares about her children. A mother who loves enough to say the tough things a son needs to hear when he needs to hear them. A mother who is transparent enough to demonstrate compassion while instilling the wisdom of Solomon. This book will stir your soul. It will spark your imagination. And this book will remind you of the power of your mother's words. Apply the sage advice Mark has shared throughout these pages and benefit for a lifetime... perhaps an eternity!*

*I fully support this book and hope everyone else loves it as much as I have!*
