HealthAsyst

CheckinAsyst

The Next Generation Patient Check-in & Clinical Documentation Solution

CheckinAsyst streamlines your check-in process by allowing patients to pre-register on their mobile phone, identify themselves upon arrival at your facility, verify and update demographic and insurance information, complete clinical and assessment forms, electronically sign consent documents and make payments against co-pays and outstanding balances.

All updates are sent back to the EHR/PM via bi-directional interface, allowing easy PHR access to providers, eliminating errors and improving front office efficiency.

CheckinAsyst offers rich functionalities to transform the way your front office functions today.

Enhance Patient Experience

- Pre-registration using mobile phones
- Secure patient identification
- Forms pre-populated with existing information
- Digital data entry & electronic signature
- Customized clinical questionnaire and assessment forms
- Co-pay & outstanding balance payment using self-service model
- Alerts & notifications
- Post-visit patient satisfaction survey
- Multi-language options
- Pain scale sheet

Transform Your Front Office

- Hardware options - iPad or a tablet-kiosk option to suit your office settings
- Easily monitor check-in status of patients
- Eligibility & Benefits verification
- Library of forms
- Analytics reports
- Bi-directional integration with EHR/PM systems allowing data update as discrete data and document format
- Extensive customer support
- Clinical Reconciliation for Greenway and Allscripts EHR

- Eliminate paper, clipboards and long queues at the front desk

- Reduce provider clicks and data entry

- Shift staff from paperwork to patient care

- Accelerate revenue cycle through point of service payment collection

- Boost patient satisfaction and loyalty

- Reduce errors by removing illegible handwriting from digitized process

- Easy access to health information

- Enable Meaningful Use compliance

Usher in the ease and convenience of Mobile Patient Engagement with the CheckinAsyst_Plus_ Module
