

Product Description

The CT51x Series is an integrated magnetic sensor especially designed for consumer switching applications based on Crocus Technology's patented Magnetic Logic Unit™ (MLU™) technology with integrated CMOS process.

The CT51x Series operates with low power consumption in low magnetic fields and large air gaps with industry leading high frequency performance. The CT51x is available in either push-pull or open drain configuration for design flexibility with high sensitivity. The CT51x is available in either a SOT-23 or TO-92 package and provides a cost effective solution for high volume manufacturing. Custom solutions are available.

SOT-23 Package

TO-92 Package

Features and Benefits

- High sensitivity
- Resistant to mechanical stress
- Low power consumption
- High frequency performance
- Digital push-pull and open drain options
- Cost-effective
- RoHS Compliant

Application Examples

- Door or lid closure detection
- Smart phones, tablets, and laptops
- Reed switch replacement
- Motor controllers
- Proximity detection
- Power switch or open-close detection
- Water, electric, and gas utility meters
- Fluid level detection

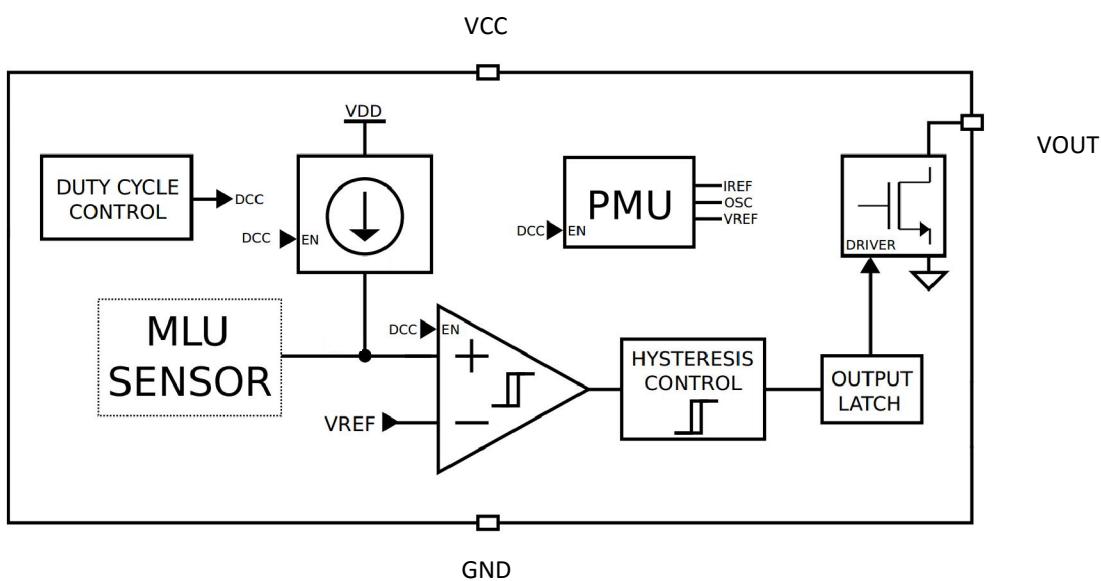

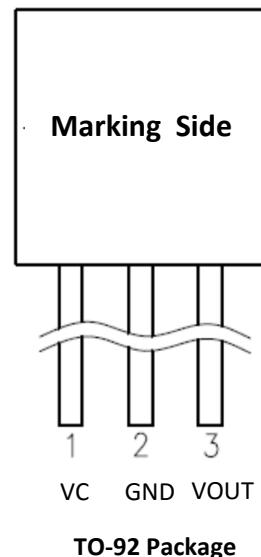

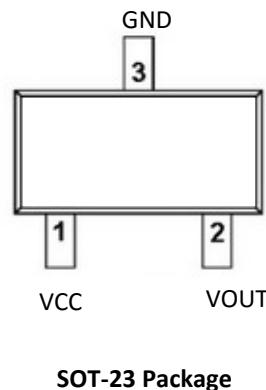

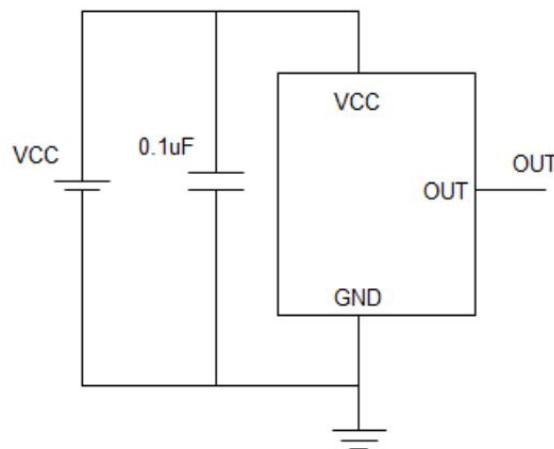

Figure 5: Application Circuit

A decoupling capacitor between the supply voltage and ground is required with placement close to the magnetic sensor. A typical capacitor value of 0.1 μ F will suffice.

CT512 Digital Output

With the open drain output, the system voltage can range up to 6V. Please keep in mind the supply to the CT511 must remain at 3V. A decoupling capacitor between the supply voltage and ground is required with placement close to the magnetic sensor. A typical capacitor value of 0.1 μ F will suffice.

Figure 10: Part Number Legend

Revision Number	Revision Date	Summary of Changes
0.1	12/15/16	Datasheet Initiated
0.2	01/7/16	Updated Part Number Guide. Deleted awake and sleep mode times. Updated Order Guide.
0.3	2/11/16	Updated Switch Point Sensitivity.
0.4	4/22/16	Updated Switch Point Sensitivity
0.5	5/5/16	Updated temperature range
0.6	6/2/16	Removed Preliminary Watermark
0.7	7/19/16	Updated Part Numbering System. Added Sensitivity Designator and removed supply voltage designator
0.8	7/27/16	Added Revision Table
0.9	8/1/16	Updated Switch Point Sensitivity and application circuit requirement.
1.0	8/26/16	Updated polarity
1.1	9/2/16	Added typical performance characteristics.
1.2	9/6/16	Added Digital Open Drain Option to create CT51x Datasheet.
