

Best Online Shops 2022

Methodology

Methodology

Summary

The Best American Online Shops were identified after passing a number of tests based on **51 objective and subjective criteria**.

First, a list of more than 9,500 online shops in the United States was compiled using Statista and online databases, online directories and price comparison websites to identify the most relevant online shops. The online shops with the most American visitors in 2020-2021 were selected as candidates for further evaluation. Online shops selling mainly digital goods (ex: airbnb.com, netflix.com), subscription-based shops, C2C marketplaces (e.g. ebay.com), B2B online shops, showcase websites and online shops that do not display their site in English were excluded from further evaluation to allow a better comparison between them. The online shops were then organized according to their main product offering into 39 categories (see slide 5).

The online shops that passed the initial screening were then tested one by one in 41 objective criteria and 10 subjective criteria on 7 dimensions:

- Structure & Usability
- Trust & Security
- Service & Communication
- Payment

- Purchase & Delivery
- Technical Performance
- Likelihood of Purchase

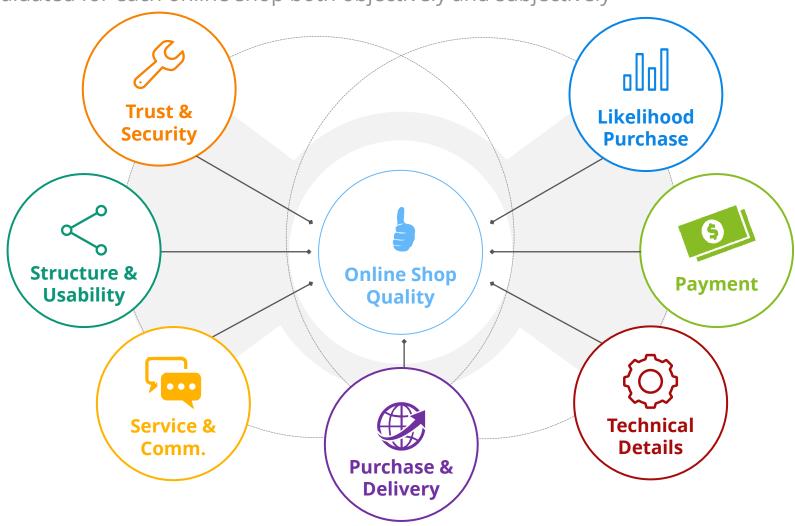

Alongside the objective test, an online survey of a panel of approximately **6,000 American online shoppers** was conducted to assess the appearance of the online shops on **10 subjective criteria** (e.g. "The homepage is very clear and well structured").

After the test phase was over, a sub-score for each dimension was calculated. Based on these results, a score out of 10 was determined for each online shop.

The top 1,000 online shops with the highest scores were then awarded "Best Online Shops 2022" and listed on the Newsweek website. The top 5, 10 or 20 per category has been selected for the print edition based on category size.

Every online shop has been tested by professional testers and rated by consumers

7 dimensions evaluated for each online shop both objectively and subjectively

Examples of criteria evaluated on the 7 dimensions

Every shops tested in the 7 dimensions that make for a well-rounded online shop

41 Objective criteria

Data collection through professional testers

10 Subjective criteria

Online survey conducted by more than 6,000 American online shoppers
